ABOUT

Software Engineer with 5 years of experience specializing in **React and Angular**. I have expanded my expertise into backend development by building APIs with **Java, Node.js, and Django**. I am now seeking a **Full Stack** role to leverage my cross-functional skills in creating scalable, end-to-end web applications.

WORK EXPERIENCE

7nsoft Systems (Mlogica)

Frontend Developer

Karachi, Pakistan

Mar 2021 – Present

- I had the opportunity to work on the **CAPM CEA** Project a crypto analysis web application built on the latest Angular version. I used Vis.js 2D graphs to detect BTC transactions, visualizing data as nodes and vertices. The UI was developed with Angular Material, and I implemented reactive forms for validation. I also created tables with the functionality to export data in CSV, JSON, and XLSX formats. We are now building similar features for Ethereum transactions. The backend was developed using Java Spring Boot by the backend team, and I integrated these APIs into the Angular frontends.
- I had the opportunity to work on the **AutoML** project, where the system processes user data and runs algorithms to generate ROC results. I handled the frontend using ReactJS and Bootstrap, creating reusable components, implementing APIs, and developing reactive forms with validations.
- I had the opportunity to work on the **7nsoft systems website** using ReactJS, Node JS, and Express JS, creating key pages like home, career, and events. I also built an admin panel for posting jobs and events, using MySQL as the database. I validated the forms within the admin panel and used the Context API for token authentication and verification.

Relocal (Malaysia Based Startup)

Software Engineering Consultant (Part time)

Karachi, Pakistan

Nov 2024 – July 2025

- **Candidate Management System:** I owned the backend development using **Django and PostgreSQL**, including a feature for automated data collection.
- **AI Resume Tool:** I built a custom **CV Maker** that uses the **Gemini API** to automatically condense long CVs into concise, one-page resumes.
- **Case Management (Frontend):** I developed the **React.js** interface for a document processing system, ensuring seamless integration with **NestJS** on the backend.
- **Recruitment Hub:** I built a dual-dashboard platform in **React.js** for admins and hospitals to manage the hiring and placement of medical staff.

Cre8ive Bench

Frontend Developer (Intern)

Karachi, Pakistan

Feb 2020 – Mar 2020

- I worked at a web development agency where I developed client websites focused on product coupons.
- Created a custom boilerplate using Gulp.js, HTML, SCSS, JavaScript, and jQuery.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, HTML/CSS, SQL, Java
- **Libraries & Frameworks:** React JS, Redux Toolkit, Context API, Tailwind CSS, Angular, Bootstrap, Angular Material, React Native, Node JS, Express JS, NestJS, JWT, MongoDB, PGSQL, Django, Firebase, Springboot

- **Developer Tools:** VSCode, Git, GitHub, Postman, Bitbucket, Jira, Vercel, AWS
- **AI Tools:** Claude Code, ChatGPT, Gemini, Cursor AI

VOLUNTEER EXPERIENCE

Google Developer Group (GDG) Kolachi

Karachi, Pakistan

Co-organizer

2024 – Present

- Co-organized community events including **Google I/O Extended**, **Google DevFest**, and the **Build with AI** series, bringing together the local developer community around the latest Google technologies.
- Delivered a hands-on workshop on **Vibe Coding**, introducing developers to AI-assisted coding workflows and prompt-driven development techniques.
- Delivered a workshop on **Google Agentic AI**, covering autonomous agent architectures, tool use, and building intelligent applications using Google's AI ecosystem.

EDUCATION

Virtual University

Karachi, Pakistan

Bachelor of Business & Information Technology

May 22 - Present

- **Computational Coursework:** Object-Oriented Programming, Databases, Data Structures.

Korean Computer Academy

Karachi, Pakistan

DIT (Information Technology)

Feb 2019 – Feb 2020

- **Computational Coursework:** HTML, CSS, JavaScript, jQuery, SEO, Bootstrap, WordPress
